“The Voice” Superstar Slots

Android and Apple apps lobby

## Overview

Super star slots is a social casino app where you can play popular casino games like roulette, poker, slots, and blackjack online. You play by downloading an app for your mobile device.

Super star slots is free to download and play, it will be monetised through in-game purchases and adverts. The currency will be virtual coins which can be used to lay bets on the games. When you're out of coins, you can't play again until they are restocked, which often happens on a four hourly basis or you may purchase new tokens.

Login – login is via the user's email and social login through Facebook integrated with Markor techs "player account management system" (PAM).

Payment system – In app purchases through apple and google payment gateways.

Geolocation – dynamic content depending on the players geolocation

Push Notifications – reminders and offers to be pushed from Markortechs player account management system (PAM).

Monetization – In app purchases to buy tokens reconciled with Markortechs player account management system (PAM).
